

NDS to Active Directory Migration Reality Check

Why a NDS Migration Reality Check?

- Transitioning from one version of a vendor's operating system to another is difficult enough. It's even more complex migrating from one network system to another.
- This essential service from LTC helps ensure your company doesn't waste valuable money or resources.

Who Benefits?

- Clients uncertain about the problems and potential risks related to a NDS to Active Directory migration
- Clients inexperienced with starting a NDS to Active Directory migration
- Companies unfamiliar with the NDS object dependencies needed to execute a NDS to Active Directory migration
- Staff uncertain about what features to keep an eye out for when selecting a third party NDS Migrator

Key Advantages

- Receive a plan of approach for a hazard-free NDS to Active Directory migration
- Eliminate the dangers and holdups that can happen with a complex NDS to Active Directory migration project
- Have experienced consultants deal with any unexpected problems that might occur during a NDS to Active Directory migration

LTC's Service Delivery Approach

- Carry out a planning meeting that identifies/ascertains: the migration necessities, impetus behind the project, migration schedule, and possible migration problems
- Examine the current messaging and networking infrastructure while developing a good working knowledge of the anticipated AD setup
- Establish and record a detailed NDS to AD migration process customized to address your environment, saving you time and money

LTC's Service Deliverables Include

- Migration Planning Session
- High level, Migration plan cookbook document

This Reality Check Service offering is currently available for \$3,300
