

Oracle Remote Quick Start

Our Quick Start service aims to enhance performance, improve database efficiency, lower costs and supply mentoring that will allow our clients to take full advantage of their Oracle database resources. LeadThem Consulting utilizes the industry-best software offered by our partners in tandem with some of the top DBAs operating in the US, resulting in a time & cost-effective solution that none can beat.

Key Benefits

Benefits of the Performance Tuning Package

- Receive detailed diagnostics and thorough analysis of your Oracle database
- Learn about database performance incongruities
- Swift problem detection
- Expert overview of database performance analysis results
- Detailed steps suggested to correct performance issue(s)
- All findings are provided to you in the form of specific plans of action, intended to maximize your database (recommendations put into action as time allows)

LTC's Service Delivery Approach

An LTC project manager will schedule a planning call, after which they will deliver the planned engagement remotely via the use of WebEx solutions.

- Detection of precise performance issue(s) by our Senior DBAs via the use of industry-leading tools (no added charge for our client)
- Scrutiny of the origin of the performance issue(s)
- Repair acknowledged performance issues as the schedule allows, or record results with detailed information for your in-house resources or contract staffing services to apply our suggested fix
- Transfer of knowledge as the schedule allows to instruct clients on the methodology we used in locating the source of the performance issue(s) and why we have suggested the changes we have

This Quick Start offering is currently available for \$2,000
