

SQL Server DBA Guardian Service

Emergencies happen. When they do, you need the best of the best to immediately identify and eliminate the problem.

LTC's SQL Server Guardian Services provide:

- A **\$111,500** savings over traditional DBA staffing methodologies (see below).
- A Senior DBA who already knows your databases inside and out on-call, 24 X 7, with a response time of an hour or less.
- Daily inspection of your critical databases to ensure optimum performance and productivity.
- Maximum performance configuration for your servers, I/O Subsystems and databases.
- Weekly reports of system health, performance and prioritized lists of work to be performed.
- Analysis and reporting on areas of opportunities and threats.
- Hands-On Training and Mentoring.
- 20 hours of SQL Server Guardian Services customized, your way, each month.
- Any additional hours needed **will be automatically discounted by 25%!**

The SQL Server Guardian Service is currently available for \$4,000 per month!

SQL Server Guardian Service FAQ's

How does it work?

Our Senior Database Administrators are the best of the best. With Guardian, a minimum of two DBAs will be assigned to your systems. Since our DBAs are intimately familiar with SQL databases they are able to provide the most superior level of support.

Our DBAs will login daily to perform health checks and provide a comprehensive report at the end of each week highlighting strengths, weaknesses, opportunities, threats and a list of work that is suggested for the following week.

LTC DBAs work closely with your staff. You decide if Interactive or autonomous support is right for you. Our DBAs can take the lead as necessary to free up management by making the day-to-day decisions associated with managing a database.

Why SQL Server Guardian as I have already purchased support?

We do what your support people will not do: proactively ensure your databases are working at the highest level. We can customize a project or administration assistance plan specifically for you.

Support is nice to have but typically it's a phone call, a case number, and a place in a long line when a problem occurs. With Guardian we seek to prevent the support call from ever happening.

We already have DBA's why do I need the SQL Server Guardian Service?

LeadThem Consulting's top-level Database Administrators compliment your internal resources and allow your team to be more efficient while at the same time providing mentoring and training as appropriate.
