

Custom Quest Micro Engagement (Remotely Delivered)

We understand that there are cases where our clients only need a few hours of help, but the help they do need is very specialized and often times very expensive. The Custom Quest Micro Engagement (CQME) was created to provide clients with assistance from our certified experts as quickly and cost-efficiently as possible.

Approach & Activities

- 1) The Custom Quest Micro Engagement is ordered
- 2) LTC receives the client's order
- 3) LTC contacts the client to discuss in detail what their needs are
- 4) The 4 hour Micro Engagement is scheduled
- 5) The WebEx Session is initiated
 - During the WebEx session, our Quest expert will work closely with the client's technical resource to fully understand what the core issue(s) are.
 - Once the issues have been identified, the consultant will assist the client in resolving the issue(s) as quickly as possible.

If Additional Time is needed...

- Another Micro Engagement can be purchased online to continue the session, assuming schedules allow for it.

Some of the Quest Software products we can assist with on our Custom Quest Micro Engagements are:

Quest Performance Analysis, Foglight (vFoglight, WCF, Oracle, SQL Server, etc), InTrust, Quest Active Roles Server (ARS), Quest Migration Manager for Exchange (QMMEX), Quest Migration Manager for Active Directory (QMMAD), Quest Change Auditor, SharePoint Migration, QAS / VAS (Vintela), NDS Migrator, Notes Migrator, GroupWise Migrator, Quest LiteSpeed, and many others.

The total cost of this service is \$750 US prepaid.
