Course Description

This course will instruct you on best practices for the installation, configuration and administration of Recovery Manager for Active Directory Forest Edition. At completion of this course you will have the needed skills and knowledge to recover Active Directory in the event of catastrophic forest event or down to recovering a single AD attribute on an AD object.

Prerequisite

This course is designed for candidates that can: Manage Active Directory, Understand GPO's, and Operate Windows Servers in an enterprise environment. Candidates should also have basic Windows PowerShell knowledge, and application configuration experience. These candidates may be the Active Directory Administrator, Windows Server Administrator, or Enterprise Desktop Administrator for their organizations.

Course Materials

Required Text

- Quest_RMADFE_v8
